Dave,

To follow up on our conversation regarding data from Steve Braund, ARRC has prepared the following request for you to transmit. Please let us know if you have any questions, or if you receive any questions from Steve Braund or ICF.

Regards,

Jay

ARRC would like to receive a copy of cultural resource information collected as part of the NEPA process for two proposed rail realignment projects in Alaska:

1. Northern Rail Extension, where the cultural resource survey work was conducted by Northern Land Use Research
2. Port Mackenzie Rail Extension, where the cultural resource survey work was conducted by Stephen R. Braund and Associates

We request copies of all relevant information collected by these firms for the projects, including digital geospatial data (e.g., shapefiles, GIS data, ArcMap products). This includes the following:

- Probability Model
- Areas surveyed, and the extent of the survey in each area (e.g., locations or spacing of pedestrian transects)
- Locations/descriptions of cultural resources identified during the survey
- Copies of supporting documents (e.g., pertinent field notes, digital photographs (e.g., artifacts collected and sites discovered during survey), sketch maps, and copies of data analyses such as radiocarbon dating forms).
- Information on artifacts collected, and whether they have all been sent to the Museum of the North

Jay C. Johnson
Of Counsel
